Electricity Bill System

Introduction

Electricity management system will keep bill records, update participants & admins information, will notify if any changes occur in the electricity board. A summarized user list can be viewed by monitoring the user details. With the feedback option, user can complain for electricity problems & load-shedding in their area. There are different modules for admin & users. One can easily contact with the admin panel. It is an efficient system that manages, stores, updates & processes accurate information. Its purpose is to manage various functions and processes necessary to operate the data efficiently. It manages the payment details & transactions online with account details. Admins job lessens because it records all the status of the user & payments. This system maintains a centralized database of all electricity bill related data & supports various functions and processes. It provides a quality service with proper surveys which users can access without any difficulty.

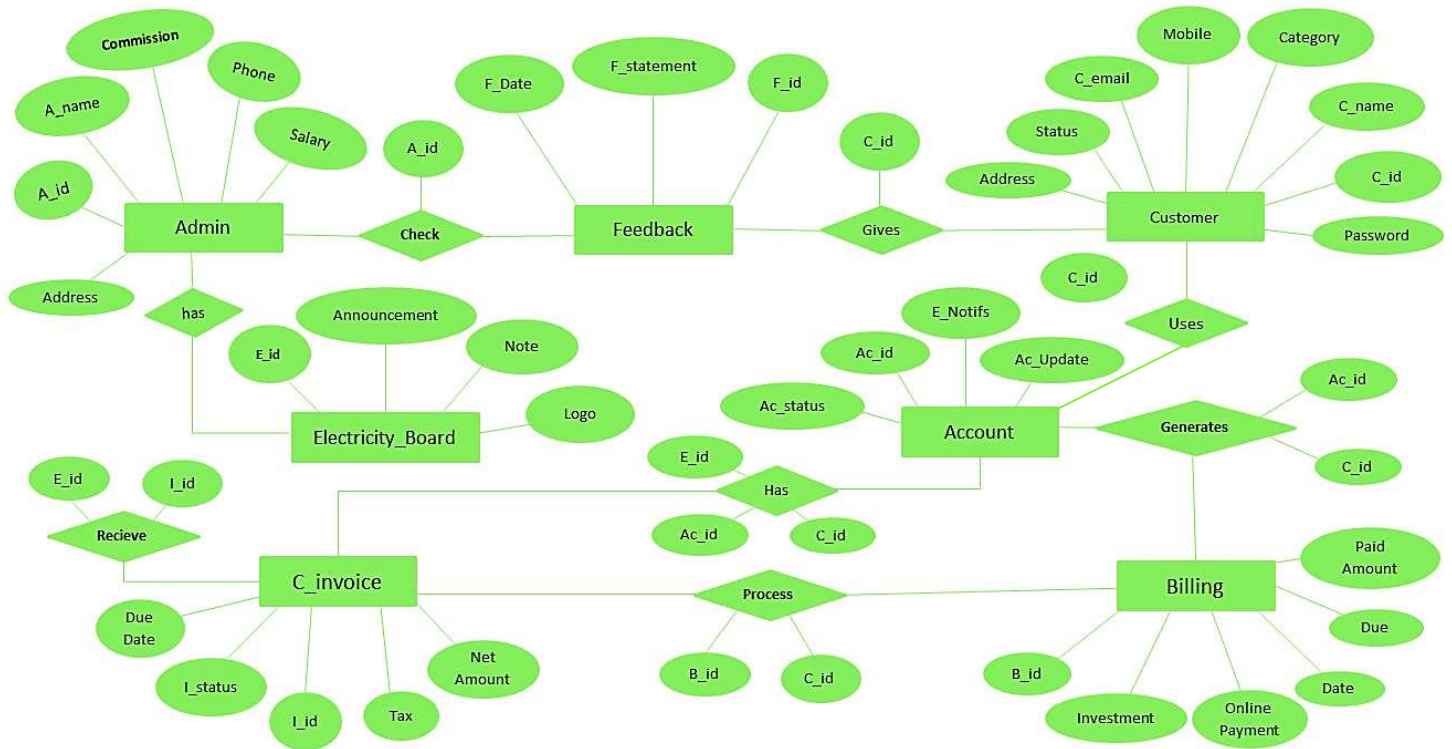

Drawbacks of Existing System

The existing electricity bill system contains manual paperwork. This process is time-consuming & requires workers for several tasks like writing the data each time, finding errors, and checking availability. There is a possibility of error in the data or problems may occur while maintaining the system. When staff or employee makes a blunder, the whole system will suffer. It takes time & man force to search for the user's information manually. It contains less security for saving data and some data may be lost due to mismanagement. The employee costing is also high as per the budget.

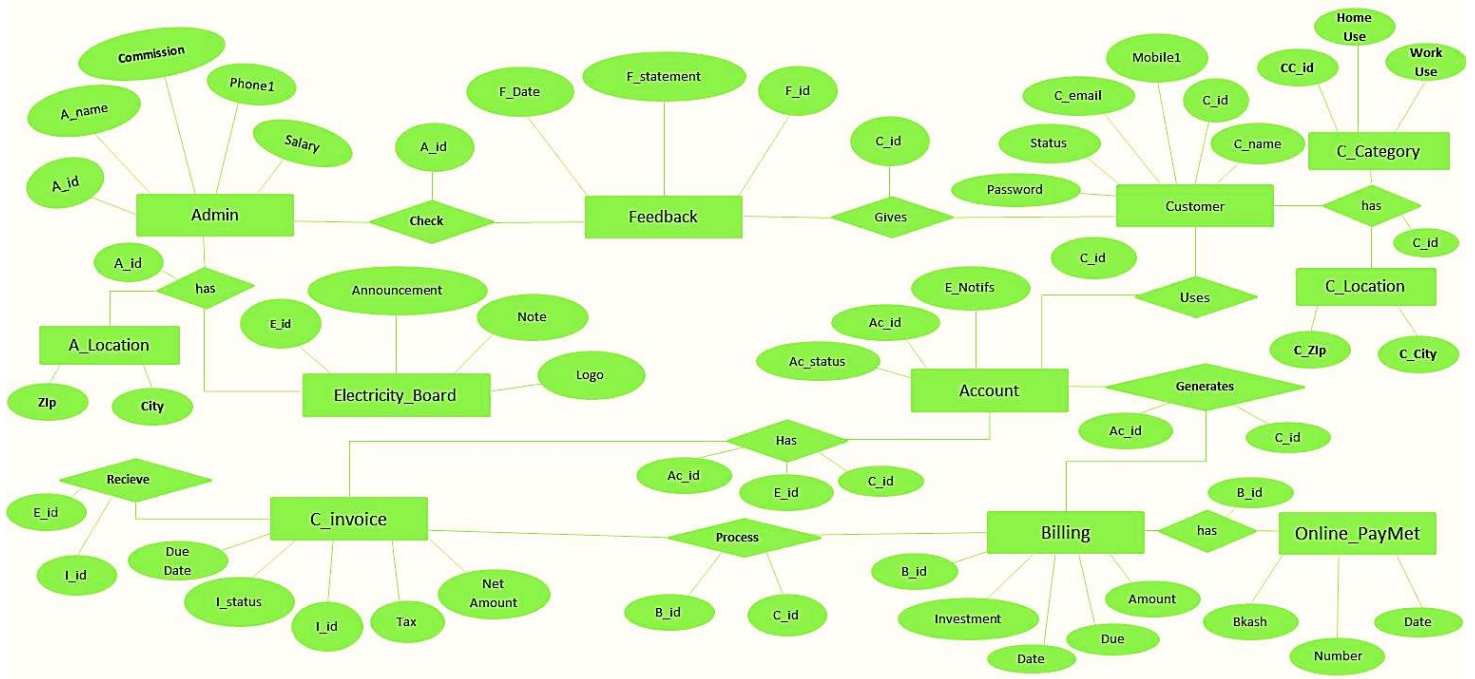

Hence, it is more convenient for a user to utilize an online application that provides accuracy & detailed work. They rather not waste their time on pen-paper-based tasks. Electricity bill Management System automates the bill function, collect information of users, update & manage the participants. The objective of this system is to manage all the data of the user bill activities & provide services accordingly. A user-friendly system with the purpose of managing various functions and processes necessary to operate the data efficiently is needed. The

project includes effectively managing all the processed data with enhanced performance & carries out the perfect vision of e-business.

where C_NAME ='Aktar Rumi' and MOBILE1='389823971');

F_ID	F_STATEMENT	F_DATE	C_ID	A_ID
511510	Customer service is amazing	17-JUN-22	211213	311328

4. Find payment information of the B_ID 1350

SQL

```
SELECT*
FROM ONLINE_PAYMETHOD WHERE B_ID=(SELECT B_ID FROM BILLING WHERE B_ID=1350);
```

O_ID	B_ID	C_ID	AMOUNT	NAGAD_ID	BKASH_ID	PAYPAL_ID	PAY_DATE	P_NUMBER
9160	1350	211245	8280.5	-	taki1190	-	15-NOV-22	4439820984

5. Show Notice of Electricity Board to Customer with E_ID 45812

SQL

```
SELECT NOTE, ANNOUNCEMENT
FROM ELECTRICITY_BOARD
WHERE E_ID = (SELECT E_ID FROM ACCOUNT WHERE E_ID=45812);
```

NOTE	ANNOUNCEMENT
Our logistic department is working on your account, 211205.	Let us know if you have any account problem

6. Show all feedback of a customer Email 'nuharabbani01@gmail.com'

SQL

```
select *
from FEEDBACK
natural join CUSTOMER
where C_ID IN (select C_ID from CUSTOMER where C_EMAIL='nuharabbani01@gmail.com');
```

C_ID	F_ID	F_STATEMENT	F_DATE	A_ID	C_NAME	MOBILE1	MOBILE2	C_STATUS	C_EMAIL	C_PASSWORD
211224	511520	Too much loadshedding in our area	12-DEC-22	311319	Maksura Nuha	1867874320	1728290055	Active	nuharabbani01@gmail.com	224390

PL/SQL

1. Write a program in PL/SQL which takes the data from ADMIN database and increase salary by 500.

```
DECLARE
  ROWS number(2);
BEGIN
  UPDATE ADMIN
  SET salary = salary + 1000;
  IF sql%notfound THEN
    dbms_output.put_line('NOT FOUND');
  ELSIF sql%found THEN
    ROWS := sql%rowcount;
    dbms_output.put_line( ROWS || ' ' || 'ADMIN SELECTED FOR SALARY
INCREMENT');
  END IF;
END;
```

Results	Explain	Describe	Saved SQL	History
---------	---------	----------	-----------	---------

14 ADMIN SELECTED FOR SALARY INCREMENT

1 row(s) updated.

2. Write a program in PL/SQL that takes the data from ADMIN and show those ADMINS who have the same salary as 'sadia haque'

```
DECLARE
  CURSOR addm IS
    select A_ID, A_NAME, SALARY, a.A_ID, CITY
    from ADMIN a, A_LOCATION l
    where a.A_ID=l.A_ID and salary=(Select salary
                                   from ADMIN
                                   where A_NAME = 'sadia haque');
```

```
acc addm%rowtype;
```

```
BEGIN  
OPEN addm;  
LOOP  
  FETCH addm INTO acc;  
  EXIT WHEN addm%notfound;  
  dbms_output.put_line('Name : ' || acc.A_NAME);  
  dbms_output.put_line('Salary : ' || acc.SALARY);  
END LOOP;  
CLOSE addmloc;  
END;
```

3. Write a program in PL/SQL to Search the name of the employee with salary between 15000 to 30000

```
DECLARE  
a ADMIN.A_ID%type;  
n ADMIN.A_NAME%type;  
s ADMIN.SALARY%type;  
BEGIN  
SELECT A_ID, A_NAME, SALARY INTO a,n,s  
FROM ADMIN  
WHERE A_ID=311348;  
IF s between 15001 and 30000 THEN  
  dbms_output.put_line('Name : ' || n);  
ELSIF s<=20000 THEN  
  dbms_output.put_line('Name : ' || n);  
ELSE  
  dbms_output.put_line('The record doesnot match');  
END IF;  
END;
```

```
Name :sadia haque
```

```
Statement processed.
```

4. Show a PL/SQL of Customer Name & Mobile number, Given ID 211224

```

DECLARE
xy CUSTOMER%rowtype;
BEGIN
select * INTO xy
FROM CUSTOMER
WHERE C_ID=211224;
dbms_output.put_line('Name : '||xy.C_NAME ||' '||'MOBILE :'||xy.MOBILE1);
END;

```

```

Name : Maksura Nuha MOBILE :1867874320

```

```

Statement processed.

```

5. SHOW in PL/SQL, FEEDBACK INFORMATION of ID 511590.

```

DECLARE
k FEEDBACK%rowtype;

BEGIN

SELECT * INTO k
FROM FEEDBACK
WHERE F_ID=511590;
dbms_output.put_line('INFORMATION OF FEEDBACK: '|| 'ID '||k.F_ID ||' '||'FEEDBACK:
'||k.F_STATEMENT||' '||'DATE : '||k.F_DATE||' '||'C_ID : '||k.C_ID||' '||'F_ID: '||
k.A_ID);

END;

```

```

INFORMATION OF FEEDBACK: ID 511590 FEEDBACK: Frequent loadshedding at XY Office, GEC circle DATE : 14-DEC-22 C_ID : 211253 F_ID: 311342
Statement processed.

```
